talk to your neighbors,
and come
organize with us!

How to fight back:
Talk to the
Ypsi Township
Board of Trustees,

an AI computing lab that
takes up as much as
a third of Ypsi's
current power demands!

It will cost taxpayers
ns of thousands of dollars.
Ypsilanti Twp has promised
the data center
at least 5 years of
free municipal water,
coming out of yourpockets!

U of M certainly isn't
contributing anything -
they don't even pay
property taxes anywhere.

Stop the Hydro Park Data Center!

linktr.ee/stopthedata

Why should you care?
The Data Center is a
social and ecological
disaster.
AI data centers require
enormous amounts of water
to be pumped out of
the Huron River.
They generate
massive amounts
of waste and pollution
that will be dumped
straight back into the Huron.
Plus, our power grid is
already unreliable.
Imagine how much
worse it will be
when it has to prop up

What:
A $1.2 billion
top secret military classified
AI computing facility
working on
"research and development
focused on
national security AI related
challenges"

Who:
Los Alamos
National Laboratory,
creator of the
atomic bomb,
and the regents of the
University of Michigan,
partnering with DTE.

When and Where:
Announced in
December 2024;
construction starting
by 2026;
operational by 2030
in South Hydro Park,
a forested and ecologically
important park
in primarily
Black neighborhoods
in Ypsi Township
by West Willow.

Ypsi will not be a sacrifice zone for UofM!
